SUMMARY

Software Engineer with 5 years of experience building scalable, user-focused web applications. Experienced in delivering performant, accessible solutions through cross-functional collaboration.

KEY SKILLS

- **Technologies** - JavaScript, React.js, Redux, TypeScript, Node.js, SQL, Jest, HTML, CSS/SCSS, AWS
- **Tools** - Git, npm, Visual Studio Code, Eclipse, Postman, Jira, PostgreSQL
- **Accessibility** - JAWS, NVDA, WCAG 2.1, axe DevTools
- **DevOps** - CI/CD Pipelines, GitHub, AWS Amplify

PROFESSIONAL EXPERIENCE

Systems Engineer, Tata Consultancy Services, Kerala, India

November 2022–July 2024

- Contributed to the development of an enterprise-scale React application built for a Fortune 500 U.S. financial services client, collaborating within a cross-functional frontend team of three.
- Implemented WCAG 2.1-compliant accessibility features (JAWS, NVDA) to meet mandatory compliance standards and pass recurring client audits, while maintaining 80%+ Jest test coverage to ensure build stability and production readiness.
- Reviewed frontend merge requests, mentored a junior engineer, and resolved 20+ post-release production issues, reducing critical bug turnaround time by 40%.
- Led performance optimization efforts by reducing unnecessary re-renders, implementing memoization strategies, ensuring cross-browser compatibility, and reducing API calls, resulting in faster load times and smoother interactions.

Senior Software Engineer, Vanilla Networks Pvt. Ltd, Kerala, India

December 2020–November 2022

- Led the introduction and implementation of D3.js for advanced data visualization, translating Figma designs into interactive dashboards and enhancing analytical capabilities within the application.
- Designed and implemented dynamic AG Grid-based data tables to support scalable, interactive data rendering.
- Designed and built scalable, reusable UI components and modular React applications using TypeScript, React Context for state management, and Emotion CSS, integrating REST APIs across 10+ Agile production releases.

Software Engineer, Attinad Software, Kerala, India

December 2019–November 2020

- Developed production-ready React-based UI components using SCSS, Bootstrap, and Redux and Websocket driven chat functionality, including Stripe-integrated payment flows, improving checkout usability and overall user experience.
- Created interactive data visualizations using Apex Charts to enhance business reporting dashboards.
- Conducted 8+ client demos, collaborating with stakeholders to refine UI features based on feedback.

ACADEMIC EXPERIENCE

Teaching Assistant, University of Houston, TX

August 2025–Current

- Mentored 80+ undergraduate students by reviewing assignments, providing structured feedback, and guiding application of project management and teamwork principles in software project simulations.
- Led weekly office hours and independently conducted full class sessions in the professor's absence, ensuring continuity of instruction and clear delivery of course material.

PROJECT EXPERIENCE

Gender Classification from Text, University of Houston, TX

May 2025

- Built a gender classification ML pipeline using BERT embeddings, readability features, and K-Means clustering, achieving 74.3% accuracy with an ensemble of SVM, Random Forest, and XGBoost models.

Serverless Web Application, University of Houston, TX

November 2024

- Led full frontend development in a 3-member team, integrating REST APIs on the client side and deploying a serverless React application using AWS Cognito and Amplify, reducing setup time by ~40%.

EDUCATION

University of Houston, TX

Master of Science, Computer Science

Expected May 2026

APJ Abdul Kalam Technological University, India

Bachelor of Technology, Computer Science

July 2019
